# onice aragosta

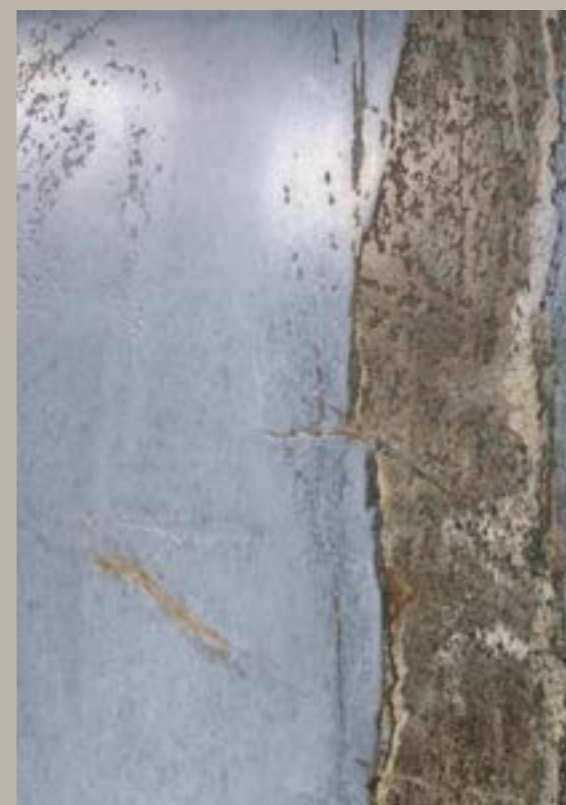

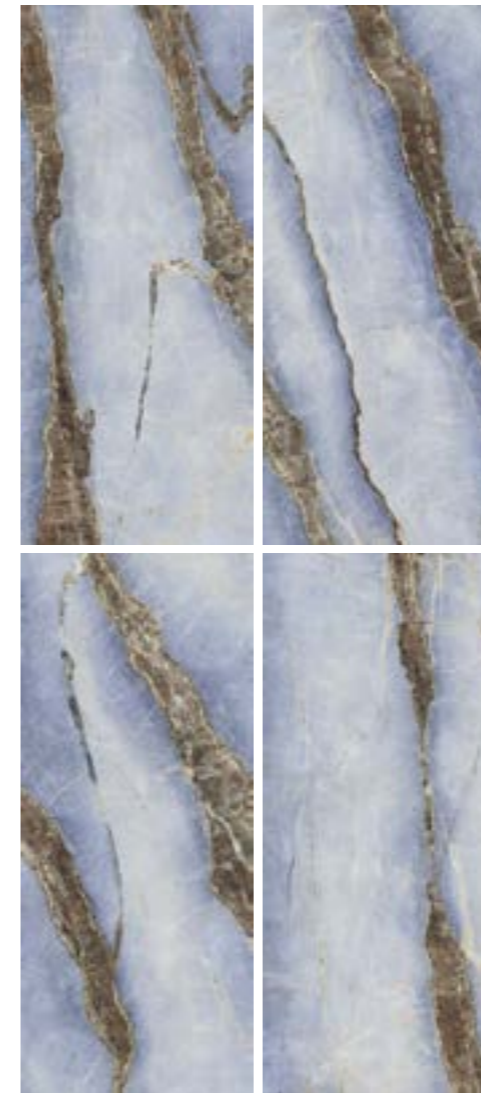

La tipologia di questo prodotto fa parte della famiglia degli Onici, la variante interpretata è conosciuta col nome di "Aragosta" proprio perché è caratterizzato da ampie venature di colore marrone arancio stese su un fondo azzurro ceruleo.

This product is part of the Onice (onyx) family, and the variation interpreted is known as "Aragosta" (lobster) precisely because it has wide brown-orange veins extending across a cerulean blue background.

# calacatta oyster

The Room™ EDITION 2023

Una versione di calacatta estremamente esclusiva, dove la superficie si contraddistingue per le grandi vene diagonali, dai toni scuri, a contrasto con il fondo bianco, particolarmente luminoso.

A highly exclusive version of calacatta where the large, diagonal veins stand out on the surface, as do its dark shades, contrasting with the white and particularly shiny background.

## tiffany green

È una quarzite di origine sudamericana, non particolarmente conosciuta, con una texture venata di piccole venature bianche e nere, e un particolare colore di fondo verde, molto simile a quello che caratterizza la nota maison di gioielli.

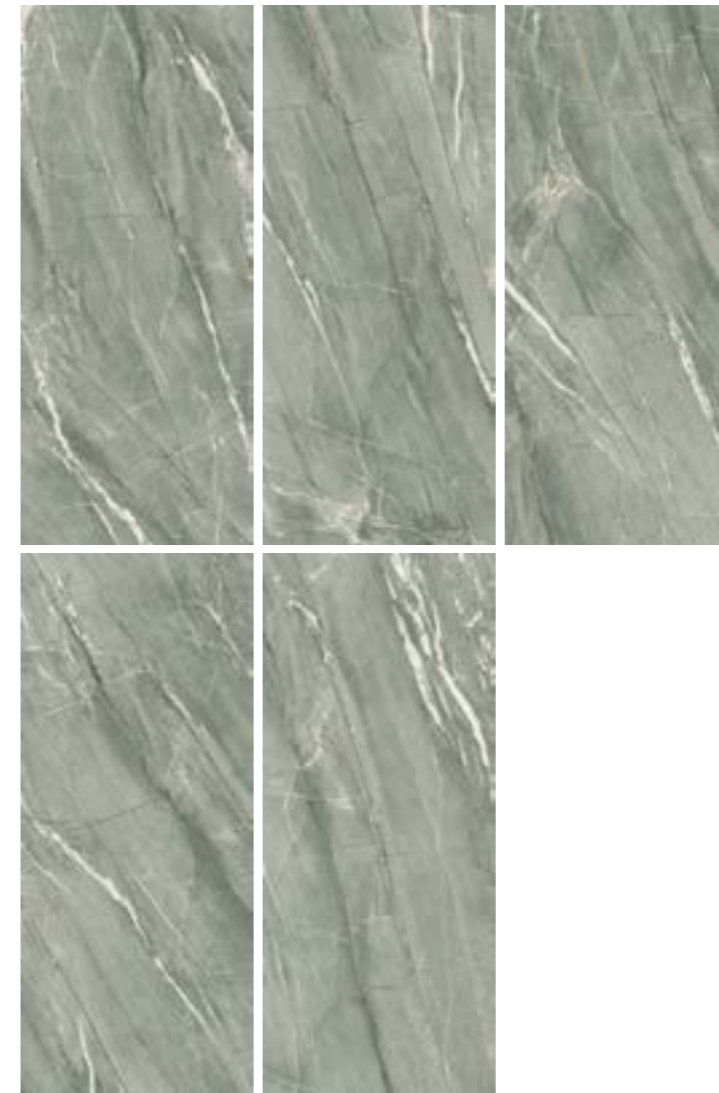

This is a little-known, quartzite of South American origin, with a veined textured of small black and white veins and an unusual green background, very similar to that of the well-known jewellery shop.

onyx  
white  
absolute

L'onice calcarea ha origini ben lontane nella storia: è il 'marmor alabastrum' dei Latini ove alabastrum deriva da una fortezza detta "Alabastra", costruita a Tebe in Egitto e dove vi erano numerose cave usate per l'edificazione dei templi. Questa tipologia di marmo in natura si contraddistingue per la sua intensa lucentezza innestata in un fondo chiaro, con bande di vario spessore che vanno dall'avorio al color vaniglia.

The origins of the limestone onyx go way back in history: it is the 'marmor alabastrum' of the Latins where alabastrum derives from a fortress known as "Alabastra" built in Thebes in Egypt and where there were a number of quarries used to build the temples. This kind of marble in nature makes its mark thanks to its intense shine inserted into a clear background, and stands out for its strips of varying thickness that range in colour from ivory to vanilla.

statuario  
vena  
piccola

Il marmo Statuario Venato di prima qualità, di provenienza italiana, ha una grana fine e presenta un fondo puro, color bianco latte, con vene grigie di piccola e media larghezza. In natura è presente in quantità molto limitate rispetto agli altri marmi bianchi di carrara.

Top quality Statuario Venato marble from Italy is fine veined with a pure, milky white background and grey veins of small and medium width. It occurs naturally in very small quantities compared to other white Carrara marbles.

# inv white

Un marmo estratto in Asia Minore, composto quasi unicamente di Dolomia che si è trasformata col tempo e col calore in una pietra cristallina e leggermente trasparente. È caratterizzato da uno sfondo bianco attraversato da un reticolo largo di venature grigie che a volte hanno piccole sedimentazioni quasi ambrate.

A marble extracted in Asia Minor and made up almost exclusively of dolomite rock which transformed over time and with the heat into a crystalline, slightly transparent stone. It has a white background widely laced with grey veins which sometimes present small almost amber sedimentations.

## panda white

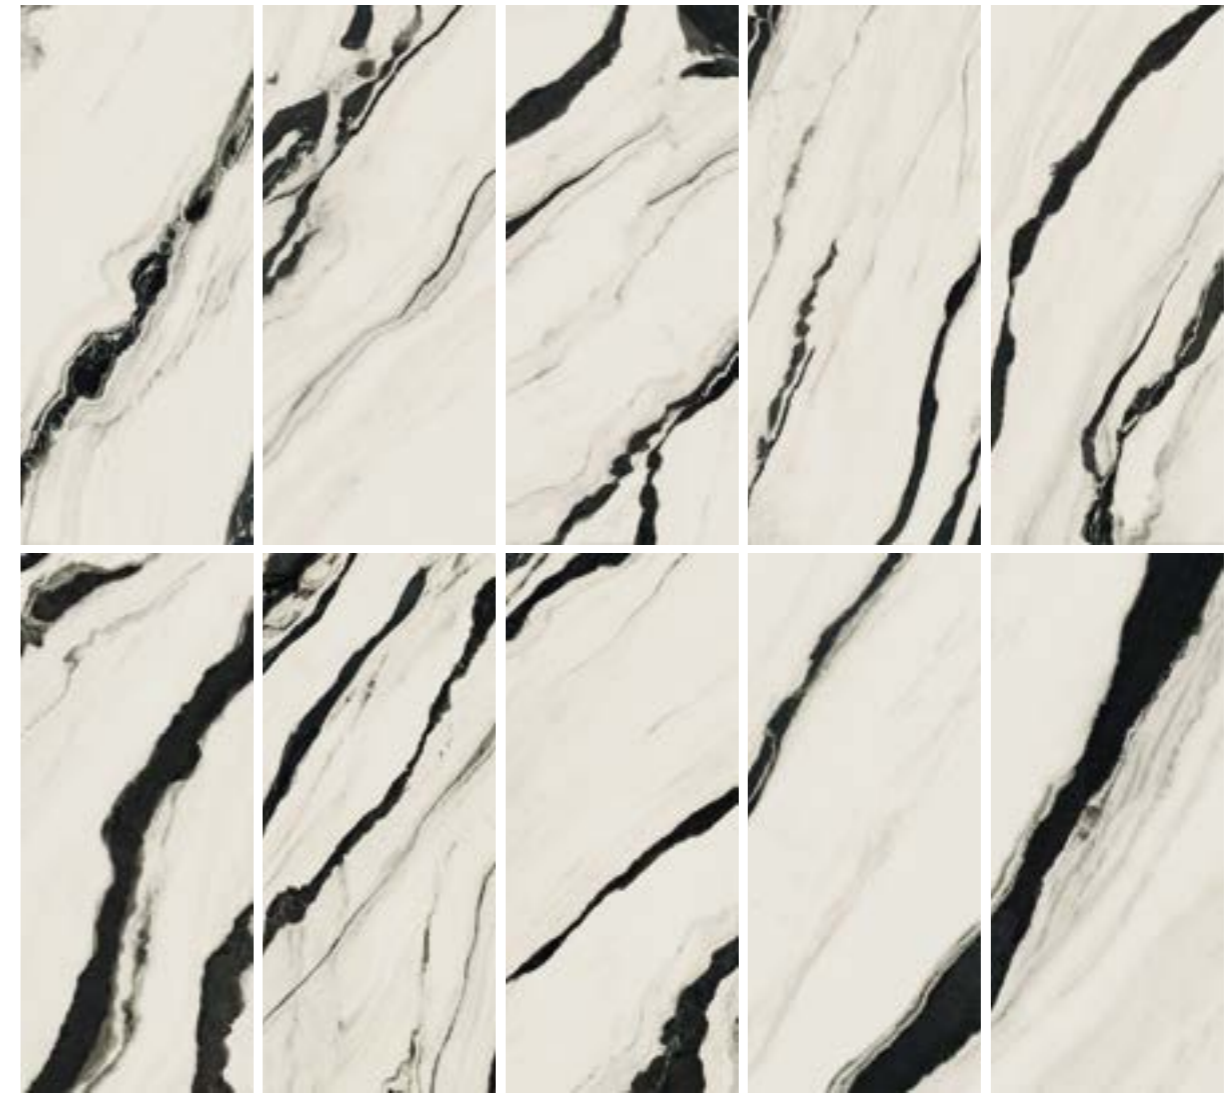

Un marmo davvero sorprendente che proviene dall'Estremo Oriente. È fortemente caratterizzato da uno sfondo bianco, accentuato da linee di un nero intenso a strisce più larghe o onde più spesse, il tutto completato da una cristallizzazione bianca su fondo chiaro che ne sottolinea la trasparenza.

It is a truly surprising marble from the Far East. It is strongly characterised by a very white background, accentuated by intense black lines with wider stripes or thicker waves and all completed with a white crystallization on the clear base which highlights its transparency.

## quartzite patagonia

È una delle pietre più particolari e scenografiche esistenti in natura. Estratta in Sudamerica, in particolare in Brasile, è di origine vulcanica e la sua struttura geologica è dovuta a milioni di anni di attività sismica. Il magma risalendo verso la superficie, raffreddandosi, si è cristallizzato incorporando al proprio interno le rocce e i minerali incontrati nel corso del suo cammino.

It is one of the most unusual and attractive stones that exists in nature. Quarried in South America, especially in Brazil, its origins are volcanic and its geological structure comes from millions of years of seismic activity. As the magma rose to the surface and cooled, it crystallised and incorporated all the rocks and minerals it encountered on its path.

## black dahlia

Proveniente dal Centro America, è una pietra che appartiene alla famiglia degli Onici Silicei. Solitamente di tonalità nera striata di bianco, è arricchita di particolari incredibili che possono variare dal giallo al marrone, fino ad arrivare quasi al rosso passando attraverso l'avorio ed il grigio.

Black Dahlia comes from central America and is a stone belonging to the silicate onyx category. Generally black with white streaks, it is enriched with incredible details that can vary from yellow to brown, even as far as red via ivory and grey.

## grey roots

Un marmo di particolare fascino, originario dell'Anatolia, caratterizzato da un luminoso colore di fondo, il grigio argento, ed arricchito da zone miscelate tra loro che vanno dalle tonalità del bianco al grigio. Sulle superficie affiorano increspature e solchi dai toni caldi dell' oro e del crema che donano un effetto di piacevole contrasto con lo sfondo grigio, conferendo al Grey Roots un senso di antica regalità e valore.

A particularly appealing marble, originally from Anatolia, characterised by a bright silvery-grey background colour, and enriched by areas mixed together, ranging from white to grey shades. Ripples and cracks appear on the surface in warm shades of gold and cream that give it a pleasant contrasting effect against the grey background, giving the Grey Roots a sense of ancient regality and value.

## gris breche dumas

E' il nome conferito a questa breccia, originaria dei Pirenei, in omaggio al noto drammaturgo francese Alexander Dumas. Un marmo sempre più difficile da reperire poiché la cava di estrazione è sostanzialmente esaurita. Per Imola l'intento è stato quello di riproporre sulla lastra ceramica l'estetica francese di questa roccia che si contraddistingue da un morbido e luminoso grigio chiaro di fondo e da sottili venature e sfumature tono su tono.

This is the name given to this pebble, originally from the Pyrenees, as a tribute to the famous French playwright, Alexander Dumas. An increasingly difficult marble to find because the quarries are basically empty. Imola's aim was to reproduce the French look of this rock on this ceramic slab that makes its mark with its soft, shiny light grey background and fine veining and tone-on-tone shades.

## grand antique d'aubert

E' una pietra estratta in Francia nei Pirenei settentrionali. La cava, chiusa per quasi 70 anni, è stata riaperta solo ultimamente. Famosissime le sue applicazioni nel mondo fra le quali la tomba di Napoleone. Si presenta a macchie bianche e nere con contrasti così definiti che non si possono trovare in nessun altro marmo presente in natura.

It is a stone extracted in France in the northern Pyrenees. The quarry, closed for almost 70 years, has only recently be re-opened. It has been used on some extremely famous occasions, including for Napoleon's tomb. Its black and white marks with such defined contrasts have never been seen in any other marble found in nature.

onyx  
aqua  
blue gold

Il marmo onice è formato da sedimenti calcarei colorati di acqua sorgiva e d'infiltrazione. Di provenienza asiatica, è un minerale che si caratterizza per il suo effetto di splendente trasparenza in superficie: una proprietà che lo rende molto raro e particolarmente adatto per gli elementi d'interni dall'elevato tocco di esclusività. Colori frequenti sono il giallo, il marrone, il rosso e il verde, declinati in sfumature inimmaginabili.

The onyx marble is made up of sedimentary limestone coloured by spring water and infiltration. Of Asiatic origin, it is a mineral that stands out for its shiny transparency effect on the surface: a feature that makes it extremely rare and particularly suited to interior design objects with a strong hint of exclusivity. Recurring colours include yellow, brown, red and green, that appear in unimaginable shades.
